Attic Duct Work

4. Electrical

Good	Fair	Poor	N/A	None
X				

Observations: Most of the attic electrical was not accessible due to insulation.

5. Exhaust Vent

Good	Fair	Poor	N/A	None
X				

Observations: The exhaust vent was functional.

6. Insulation Condition

Good	Fair	Poor	N/A	None
X				

Materials: fiberglass batts
Materials: 6, inches

7. Attic Plumbing

Good	Fair	Poor	N/A	None
X				

Observations: Most of the plumbing was not accessible due to insulation.
Several of the vent pipes terminate in the attic. This can cause a buildup of moisture and eventually mold in the attic.

8. Structure

Good	Fair	Poor	N/A	None
X				

Observations: Truss type roofing present

9. Ventilation

Good	Fair	Poor	N/A	None
X				

Observations: There is proper ventilation in the attic.

10. Vent Screens

Good	Fair	Poor	N/A	None
X				

Observations: All the vent screens in the attic are present and in good condition.

Bathrooms can consist of many features from jacuzzi tubs and showers to toilets and bidets. Because of all the plumbing involved it is an important area of the house to look over. Moisture in the air and leaks can cause mildew, wallpaper and paint to peel, and other problems. The home inspector will identify as many issues as possible but some problems may be undetectable due to problems within the walls or under the flooring..

The heating, ventilation, and air conditioning and cooling system (often referred to as HVAC) is the climate control system for the structure. The goal of these systems is to keep the occupants at a comfortable level while maintaining indoor air quality, ventilation while keeping maintenance costs at a minimum. The HVAC system is usually powered by electricity and natural gas, but can also be powered by other sources such as butane, oil, propane, solar panels, or wood.

The inspector will usually test the heating and air conditioner using the thermostat or other controls. For a more thorough investigation of the system please contact a licensed HVAC service person.

The Interior section covers areas of the house that are not considered part of the Bathrooms, Bedrooms, Kitchen or areas covered elsewhere in the report. Interior areas usually consist of hallways, foyer, and other open areas. Within these areas the inspector is performing a visual inspection and will report visible damage, wear and tear, and moisture problems if seen. Personal items in the structure may prevent the inspector from viewing all areas on the interior.

The inspector does not usually test for mold or other hazardous materials. A qualified expert should be consulted if you would like further testing.
