Canadian & Texas 7-2 Home Inspection Template included

ALL inspectors receive 3 months free of our report upload and website hosting services. Get rid of those old home inspection forms! Receive 1 year free membership in InterNACHI (\$365 value, new members only.)

We have developed the best **home inspection report software** for **Mac & Windows and Linux** to allow you to quickly and efficiently perform home inspections. With this commercial and home inspection report software in hand you will be able to easily compete with larger inspection corporations. Our home inspection software designed in cooperation with home inspectors who were tired of other programs not living up to their expectations. Home Inspector Pro is currently being used in at least 17 countries and 7 languages that we know of (English, French, Italian, Spanish and German). View an animated tutorial overview of our inspection software. We now have templates for home inspections, commercial inspections, mold, septic tank, pool inspections and more. Users can share their inspection templates with each other through our message boards.

A few of the features:

- Easily create a template for every type of inspection you perform. For example load one template for a commercial inspection then switch to your residential home inspection template for your next job.
- Spell check in 5 languages integrated into every portion of the program.
- Designed for a Tablet PC like the HP Slate 500, HP Slate 2, CTL2go, to almost eliminate the need for your keyboard during an inspection yet the program works great on a normal laptop. Android, iPhone & iPad versions coming soon!
- Ability to upload inspection reports for real estate agents, home buyer/seller, and you to

view for up to 5 years.

- Allows you to upload reports and email a link to the report in one easy step.

- Reports are easy to for the home buyer/seller to read and Home Inspector Pro includes a table of contents integrated into the report summary for maximum clarity.

- Add unlimited photographs anywhere in your report, edit them within the program. Add hundreds within seconds.
 - Works great with thermal images.

 - Reorder pages, control page breaks and create colored borders.
 - Specific template for Texas (TREC) inspectors.

 - Currently being used in at least Australia, Canada, England, France, Italy, New Zealand, Portugal, South Africa, Spain, United States.
 - **Runs on Mac, Windows 98 through Windows Vista and Windows 7 (32 and 64 bit machines)!**
 - **Easy to use commercial and home inspection software that runs on Windows, Mac or Linux!**
